Austria and Prussia.

German journals continue to discuss with keen interest the probabilities of a war between Austria and Prussia. Nothing has as yet transpired to throw any light upon the eventful issue of the quarrel.

The London Morning Post of the 29th says that the position of affairs every day becomes more critical.

In Berlin the language of the press, by evident dictation of the Government, is warlike, and great military preparations are being made everywhere throughout the kingdom.

Prussin has forwarded a circular dispatch to the minor Gorman States, laying stress upon the inediciency of the appeal to the Federal Diet to settle the present conflict. The dispatch further points out the necessity of the various States taking up a definite position on one side or the other, in the struggle which the armaments of Austria seem to render more and more imminent.

The dispatch accuses Austria of having violated the convention of Gastein and assumed a threatening attitude. It expresses doubts as to the power of the Confederate States to carry out their good intentions toward Prussia in the relative state of the Federal military organization, and points out the necessity which has arisen for introducing reform in the present system.

The dispatch concludes as follows:

"It is urgent for Prussia to know if, and to what extent, she may rely upon your assistance in case she abould be attacked by Austria, or forced into war by unmistake-ble memory.

orders may have been given by Prussia to take such
military preparations as may be indispensable.

PROM ALBANY.

New-York? and Brooklyn Interests-Third Bending of a Large Number of Bills-Debates and General Proceedings.

ALBANY, April 10, 1866. Both Houses have done an extensive business to-day in

the third reading of bills. In the Assembly an animated debate sprang up on the bill to incorporate the "Producers' Warehouse, Guaranty and Commission Company." Messra. Pitts and Brandreth avowed themselves utterly opposed to it and to all associations of a kindred character, and Mr. Cochrane thoroughly dissected it and exposed its hideone features to the view of his hearers. During the discussion it came out that the brother of ex-Speaker Littlejohn was interested in the scheme, and that he had spent the Winter in Albany looking after it. The ex-Speaker favored the passage of the bill. The debate was rather spicy.

In the Senate, the bill allowing Supervisors to levy a tax upon towns that have not responded to the apportioned amount, from the Chief of Burean of Military Statistics, for the erection of a Hall of Military Record, was debated by Messrs. Godard, Sessions and Folger. It was finally so amended as to prevent the levying of the tax except upon the request of the town authorities, nor can it be paid out except by the direction of the Board of Town Auditors. In this shape it was ordered to a third reading. and Commission Company." Messrs, Pitts and Brand

The Assembly, yesterday afternoon, considered, in Committee, the bill making appropriation for military purposes, and progress was reported. In the House, permission to sit upon it again was refused; in other words, it was defeated. The bill proposed to take from the Treasury the trifling sum of half a million of dollars. As the military establishment received \$800,000 last year, and will get \$200,000 in the General Appropriation bill this year, it is thought it will be able to go through the present season, if at all economical, without the additional half million asked for. million asked for.

LICENSE IN NEW-YORK.

In the House, yesterday, Mr. Brandreth moved that the Committee having the bill in charge, report the act relative to the selling of liquor in the Metropolitan District, Wednesday morning. The Committee would not be ready to report; they claimed, they wanted more time; but Mr. Brandreth thought they had had time enough, and so did the House, and directed them to report to-morrow morning. The Liquor Dealers' Association of New-York, it is believed, would be willing to pay \$4 50 at least, to defeat this bill.

EXPENDITURES FOR PUBLIC PRINTING.

Squator Wolcott, Chairman of the Scenate Committee

Squator Wolcott, Chairman of the Senate Committee on Public Printing, early in the sension submitted to the Senate a report in which he brought to the attention of that body the unnecessary expenditures for public printing which had characterized the legislation of previous years. This report shows that while responsible parties are under contract to do all the Legislative printing for the sum of \$50,000 annually, for a series of years, the sums at \$40,000 annually, for a series of years, the sums annually expended have been greatly in excess of that amount, notwithstanding the contract. This excess has gradually increased, until last year, when the entire

sums annually exponded have been greafly in excess of that amount, notwithstanding the contract. This excess has gradually increased, until last year, when the entire smount paid for public printing was \$214,161 50. Of this, \$127,048 19 over what the State was obliged to pay by the contract with the public printer.

In view of the fact, and the financial condition of the State, Mr. Wolcott recommended that the present Legislature, without being governed by any parsimonious and niggardly policy, should, in the matter of legislative orders for printing, adopt a rule of rigid economy, and only authorize such expenditures as the public interests demanded. The recommendations of the Sonator were unanimously concurred in by the Senate, and were most cheerfully assented to, for the time being, in the Lower House. As Chairman of the Committee Mr. Welcott has never swerved from the rule laid down in his report. Every proposition for printing has been carefully secutinized, and the number of copies ordered reduced to just what the public interests have seemed to require. Probably by this course the expanses of printing ordered by the Senate have been reduced one-half, and many thousand dollars seved to the tax-payers of the Sinte this year, while the public has in go sense been the sufferer by the rule adopted.

9 Mr. Wolcott has earned the thanks of the people of this State for having so firmly resisted the pressure frequently made upon him for reports favorable to printing schemes in which parties were more interested than the public. Had the House Committee, or had the House itself held out as it commenced, and coöperated with the Senate, a vast sum would have been saved to the State. Instead of being, as last year, \$137,000, the expense need not have been \$20,000.

been \$50,000.

It is but just to Mr. Wolcott's associates, Messrs.
Humphrey and Sutherland, to say that they have cordially supported him, as have the Senators generally, as
shown by the fact that in no instance has the Senate
falled to sanction the recommendations of its Committee.

Trotting on the Fashion Course, L. I .- The

First Trot of the Season. Yesterday a fair attendance of the habitues of the trot-ting track and the personal friends of the respective own ers of the horses engaged in the race, was present on the Fashien Course, L. in five, in harness. It was not regarded as the legitimate epening or the typing season, which takes place on Tuesday next, when the first of the series of purses offered by the proprietor will be contested; hence the absence of many of the most influential supporters of the trotting turf may be accounted for.

The day was fine and cleer, although there was a keenness in the air which showed that Winter had not quite departed. There were three horses entered for the race—Mr. Clarkson's b. g. Rockland Boy; Mr. Thaney's g. g. Stevens, and Mr. Conroy's b. m. Lady Jones. Rockland Boy was the favorite in the pool betting, selling for \$18; Lady Jones, \$16, and Stevens \$12.

The race admits of but little description, for the Lady took a decided lead from the start, and her opponents breaking so badly that they could scarcely be got down to a square trot throughout, she came home an easy winner by three lengths in 3:01, the judges distancing the other two for having run the greater part of the race.

The discussion gave great dissatisfaction to the interested individuals who had invested their cash on the distanced horses.

Tribune.

A few weeks since "The Manchester Land Company inserted their advertisement in THE WEEKLY TRIBUNE. and in six other papers in this State and New-England. Under date of April 5, 1866, Mr. Brown writes to one of

the editors of THE TRIBUNE as follows: DBAR SIR: That advertisement has done wonders. I have received nearly a thousand letters from all the States from Maine to Iowa, inquiring about the Manchester lands, asking terms, requesting a pamphlet, etc., and nine-tenths of them commence with the words, or their equivalent: "Having seen your advertisement in The Tannens, and having also read Selen Police of the Tannens. ion Robinson's descriptions of West Jersey. I write for

forther information."

The result of advertising in your paper has been so satisfactory, that I have concluded it the best economy to continue it in THE WHEKLY THIBUNE, however large the expense, and

discontinue it in all other papers.

We are getting in a first-class set of people, Maine being largely represented. A party which purchased land last week has returned to load a vessel with lumber and the household goods of six families. This vessel will come into Barnegat Injet and up Tom's River within nine miles of Manchester. The project of settling the wilderness of New-Jersey is nuccess in which THE TRIBUNE may congratulate itself, as

Not a man who has come to see for himself has expressed one word of dissatisfaction at what you have said about these lands. They have found everything exactly as you have represented. Respectfully yours.

LEWIS B. BROWN.

THE WREELY TRIBUNE has a circulation larger than that of any other newspaper, and a large proportion of its subscribers take no other journal. The space in this sheet allotted to advertisements is necessarily limited, so that each has the advantage of being easily seen, and all are generally read with as much interest as news-matter

others soon will, for the good work in this cause.

There is as those who have tried it know-no advertising medium in the country so cheap, because there is none so profitable, to the advertiser. The paper circulates among the industrial and thrifty classes—the Farmers, Manufac-turers, Merchants and Mechanics of the country—and is carefully read by their wives and daughters. It is safe to say that each advertisament in it is read every week by not less than half a million of the most intelligent of the people. He who makes his business, his merchandise or his manufactures, known to this immense number, scattered all over the loyal States, cannot fail to do so to his own manifest and great advantage.
